QP6354715 RESULTS.txt

*** End of Data 227 records ***

Network call data is obtained from Telstras various network switches and provides a listing of the components of calls and SMS (Short Message Service, a text message sent via a voice network) made from and/or to a particular telecommunications service; this may include communications switched between a non-Telstra service and a service on Telstras network.

A Number	The telecommunications service that originated the call
B Number	The telecommunications service that received the call
Date	The date of the call
Time	Local time (24 hour clock) for the party identified at column AB
Duration	The duration of the call in seconds (or SMS)
Div	When D1 is present this identifies a diverted call
AB	A or B in this column identifies which party the record (and the
IMEI, CGI and	Location) relates to; if no value is present this signifies an intermediate record which does not relate to either party
IMEI*	The International Mobile Equipment Identifier, a unique handset identifier
CGI*	Cell Global Identity, unique world-wide mobile network cell identifier
Location*	The name of the Telstra base station relating to the network cell used to connect the mobile service to Telstras network

*IMEI, CGI and Location values are present only in relation to Telstra services, or other carrier/service provider services which are using Telstras network.

Telecommunications networks may generate multiple records of the same call or SMS within their various switches. This is a normal situation. The multiple records represent different components of the same call, for example a record is created when a call is passed from one telecommunications carriers network to that of another telecommunications carrier, or where a call is made to an Intelligent Network service (e.g. a 1800 or 13 prefix service) or between switches on the same carriers network. Each record may be the same or may vary by typically about 1 to 2 seconds, representing either timing differences between networks or elapsed time between the different components of the same call or SMS.]
